

ZERO FAQ

- **Can multiple ZERO controllers be used at a time to play games?**
Yes, you can. Just connect them via Bluetooth connection, as long as the device can take multiple Bluetooth gadgets.
- **What systems does it work with? Does it auto reconnect to those systems?**
It works with Windows 10, iOS, macOS, Android, Raspberry Pi.
It does auto reconnect to all the systems mentioned above with the press of START once they have been successfully paired.
- **How does the LED indicator work?**
 - A. LED blinks once: connecting to Android, Windows 10, Raspberry Pi, macOS
 - B. LED blinks 3 times: connecting to iOS
 - C. LED blinks 5 times: camera selfie mode
 - D. Red LED: low battery
 - E. Green LED: battery charging (LED turns off when battery is fully charged)
- **How do I charge the controller? How long does the battery last when fully charged?**
We suggest you charge it via a phone power adapter.
The controller uses 180mAh rechargeable battery with 1 hour charging time.
The battery can last up to 20 hours when fully charged.
- **Can I use it wired, via a USB cable?**
No, you can not. The USB port on the controller is a power charging port only.
- **Does it work with 8BitDo Bluetooth receivers/adapters?**
Yes, it does.
- **What is the Bluetooth range?**
10 meters. This controller functions the best within the range of 5 meters.
- **Can I upgrade the firmware of this controller?**
No, you can not.
